TORUS GAMES

Torus is an Australian team of dedicated game developers working mainly remotely, developing video games across a wide variety of styles and genres.

As a company we have created licensed products for Disney, Dreamworks, Sony, Mattel, Nickelodeon, and many others. Currently, we're working on both original and licensed titles in the tactics, RTS, sports and FPS genres.

Torus is growing and we are looking for new team members who are highly capable in Unity or Unreal development to join us in achieving our goals. We need passionate individuals who have delivered at least one commercial game title on PC or Console game platform.

The position is as a programmer working with the existing team using scrum and sprint to create games for clients in a timely and cost effective manner. Project management is handled using ClickUp and Jira.

Team members are expected to work professionally with a minimum of supervision and to create high quality code that is as bug free as possible. Code revision control is handled using Perforce.

HP

We love taking on tough challenges, disrupting the status quo, and creating what's next. We're in search of talented people who are inspired by big challenges, driven to learn and grow, and dedicated to making a meaningful difference.

HP is a technology company that operates in more than 170 countries around the world united in creating technology that makes life better for everyone, everywhere.

Our history: HP's commitment to diversity, equity and inclusion – it's just who we are.

From the boardroom to factory floor, we create a culture where everyone is respected and where people can be themselves, while being a part of something bigger than themselves. We celebrate the notion that you can belong at HP and bring your authentic self to work each and every day. When you do that, you're more innovative and that helps grow our bottom line. Come to HP and thrive!

Being part of HP means access to an international community with lots of growth opportunities within the company, professional development resources, networking opportunities, while enjoying in a great atmosphere making an impact.

Paid Internship

- Flexible work style and schedule to adapt to Bachelor's or Master's degree academic program. Part time (4h/day) or full time (8h/day) for a 9 to 12 months agreement.
- Flexibility to keep a good work life balance.
- Mentorship program: you will be assigned a Senior engineer as a Mentor

QUERCUS TECHNOLOGIES S.L.

Quercus Technologies is a consolidated company in the parking sector with installations worldwide, being a world reference in license plate recognition, vehicle detection, and parking guidance systems. We develop innovative computer-vision-based devices, hardware, and software products that make up Quercus Technologies a comprehensive parking solution.

We are seeking for a innovative Junior Java Developer to join our Software Department to develop and maintain the BirdWatch product. The team will be focused mainly on BirdWatch, however, if the candidate is motivated to participate in decisions and design/implementation for other projects in the department, we offer this possibility.

BirdWatch is a powerful parking management software based on a revolutionary concept: total control over parking facilities from a unique, global parking software suite.
